

Mathematics Faculty Teaching Evaluation
Summer Quarter 2009

PARK, F.E.

The questions were:

1. How would you rate your instructor as an effective teacher?
2. How would you rate the availability and helpfulness of your instructor outside of the classroom?
3. What is your rating of this course independent of the effectiveness of the instructor?

Math 32A, Sec. 1 - Calculus of Several Variables

	Distribution of Scores											Avg	Stdv
	Blank	NA	Failing 1	2	3	4	5	6	7	8	Excellent 9

SUMMER SESSIONS 2009

Math 32A, sec. 1 – Calculus of Several Variables

9-8-3

Great professor willing to answer all questions.

9-9-9

Dr. Park is an absolutely brilliant teacher. The best math instructor I've ever had.

9-9-8

Dr. Park is definitely the best Math professor I've taken a class with at UCLA. He is knowledgeable & friendly and makes students feel comfortable about asking questions. He is also very available outside of the classroom.

9-9-9

Great instructor loves what he does, willing to help.

9-9-9

Professor is on target ensured that TA would be helpful & that assignments would be passed back. Clear communication & insightful lectures are his strengths.

9-9-9

I enjoyed every lecture with Dr. Park. He is the best math teacher I have had at UCLA by far.

9-9-8

Dr. Park is a great guy & a fun teacher. Made two and a half lectures fun.

9-9-9

Very effective teacher and strong sensitivity to student's progress.

9-9-9

Very good lecture. Always available to help us with problems during office hours. Prepares us well for exams.

9-9-8

Park is great!

9-9-9

I thought Dr. Park was a great instructor. He taught the class very well.

9-9-8

Clear expectations for exams.

PARK, Frederick

Math 32A, sec. 1 – Calculus of Several Variables (cont.)

9-9-9

Excellent Class.

9-9-8

The course moved very fast but Dr. Park was a fantastic professor who always paused in class to answer any questions before moving on and made sure everyone understood the material. He is also very available outside of class for students who need extra help.

9-9-9

Dr. Frederick Park definitely knows his material, thoroughly. He is very helpful and has a wonderful attitude towards his career. Above all his character as a person is definitely worth knowing. He is a great instructor.

9-9-6

Dr. Park made math 32A a bearable subject. Due to his wonderful lecture, I truly understand the material.

9-9-9

Dr. Park was very patient and effective in his explanation of concepts. By far the best math class I ever had.

9-9-9

Professor Park was a great teacher, explained things well, and always available for extra help.

9-9-9

Very lucid explanations of material.

9-9-8

The instructor was clear in his explanation of concepts and problems. He also taught in an entertaining and stimulating manner. I feel I learned more than I have with most instructors.

9-9-9

The practice exams were every helpful. Grading seems pretty fair. Loved the instructor.

9-9-9

Best professor I have had at UCLA. Lectures were extremely well organized. The material was difficult, but he made sure everyone understood. Lecture was never boring so it was easy to pay attention extremely fair grader. Enjoyed the class very much & wouldn't want to take math with a different professor.

PARK, Frederick

Math 32A, sec. 1 – Calculus of Several Variables (cont.)

8-9-9

Very thoroughly prepared with materials including great examples. Summer was short but we were aptly able to cover the whole material. Instructor was very helpful outside of class and never hesitated in giving us extra materials or reviews we requested.

9-9-9

By far the best instructor I've ever had & probably will ever have. Lectures are highly organized & instructor actually cares about whether or not students are actually learning.

9-9-9

Dr. Park is incredibly knowledgeable about the subject of multivariable calculus and extremely effective at delivering an educational experience that gets his knowledge across.

9-9-9

Effective teaching. The homework helps a lot. Very happy with the outcome of this class interesting. Hope that the test would be more challenging and carved accordingly. I feel that the test should be above the potential of the students.

9-9-8

I had not taken math classes in three years, but Dr. Park made the material really accessible and easy to understand. His examples and drawing used in lectures were phenomenal and instrumental in grasping the concepts better. Highly recommended.

9-9-9

Dr. Park is the first professor I've taken that lives up to his title. I've taken this course for the third time and finally get the material. A UCLA math department treasure.

9-9-9

The homework load was fair, the midterm was fun and challenging, and I truly enjoyed the teaching methods of Dr. Park. He was very organized, helped us students extensively, and taught the subject very well. If I had to take other Math courses, I would definitely take those that Professor Park teaches. Great Job!

9-9-9

Truly one of the best math professors at UCLA. Very approachable, helpful & lectures are well constructed. His way of teaching made me contemplate changing my major. I never knew a math teacher could be so energetic & interesting as Dr. Park. My only regret is not taking other math classes with him.

9-9-9

I had to retake this course. Dr. Park was a great instructor. Had I taken the course with him previously, I would not have had to retake the course. I was able to grasp this subject matter much more easily than a lot of my other classes.

PARK, Frederick

Math 32A, sec. 1 – Calculus of Several Variables (cont.)

9-9-9

He is clear, efficient, and organized. Excellent picture and neat handwriting. Answers questions well. Assigns appropriate & applicable homework. But he also goes beyond and shows us how it can be used outside the classrooms course work. He is also very funny!

9-9-9

First of all, Dr. Park is by far the best Math teacher I have ever had (far surpassing two other professors I have had at UCLA). The lectures, homework, and exams focus on the same material (versus a lecture on proofs that has no relevance to HW and exams). Also, he is funny and makes the lectures interesting by explaining how the material relates to the real world.

9-9-9

Dr. Park was honestly one of the best professors I have ever had. Diligent, clear, concise, thorough in his explanations, and genuinely passionate about the subject & teaching it, I cannot be more appreciative of having had the chance to be a student in his class. He really wanted everyone to learn & never made anyone feel like they were asking a “dumb” question but made the greatest effort to answer & explain.

9-9-5

Thank you Dr. Park for teaching this course. You are a great teacher and my problem with this class lies in its pace and not with you. It is simply too fast. There's too much information in too short a time. In a less constrained setting, I can see myself getting much more from your lectures. All in all, thanks for this course I know that the schedule can't really be altered, so I really appreciate the amount I was able to learn.

9-8-8

Dr. Park is fantastic he is an effective professor because he manages his class extremely well (we were never let out late & never felt rushed, even in a summer session), he teaches with a good mixture of theory & examples, he constantly solicits student's feedback throughout his lectures, & the expectations for the class are clear. Only thing that can be improved: don't start examples at the end of one class and finish it during the next one & write out more algebra in examples.

9-9-9

This was hands down the best course I have taken at UCLA with the best professor I have ever encountered. If “10” were an option in rating this professor, I would give him straight 10's. Every professor at UCLA should be like him, every course should be like this one. I believe the majority of professors in the UCLA Math Department could learn many things from this man. I never wanted to go past 32A here at UCLA, but after this class I might.

PARK, Frederick

Math 32A, sec. 1 – Calculus of Several Variables (cont.)

9-9-9

Dr. Park is a great teacher; it was a pleasant experience being taught by him. He was really helpful, answered all the questions and he was funny as well.

9-9-9

As the one of the only high school student in this course, Dr. Park was one of the most brilliant and helpful teachers in Mathematics that I have ever had.

9-9-8

F. Park is one of the best Math professor I have ever had his instruction style facilitates useful note taking and teaches in a way that makes sense. His instruction is so effective, he can write his own book and when most math teachers have use them as clarification to the book, it is opposite in this class as F. Park demonstrates a great understanding of the material and great passion in his teaching and care for his students. Definitely one of the best math professors I've ever had and best teachers highly recommended!
